Abstract: This in the article small business and private entrepreneurship development directions, small business national in the economy place and importance economic indicators through illuminated. Small business and private entrepreneurship market environment fast adapt getting, employment provide income formation and that's it through his inequality softening and medium the owners layer decision in finding advantages open given

Keywords: small business, property, investment, unemployment, incentives, competition, employment.

INTRODUCTION

Currently, small business and private entrepreneurship are considered to be one of the most advanced forms of business organization in developed countries, and the class of civilized entrepreneurs is defined as the main driving force of the market economy. All big enterprises activity their organizational works take going to administration take size of bride big has been resources centralization and of them ineffective use cases such as shortcomings showing transition can.

Small business and private entrepreneurship in the activity more creative, free, informal environment the market is formed requirements faster adaptation opportunity have will be.

Many foreign in the states small business state to politics owner complex structure being, in this of entrepreneurs right and interests protection to do legal to the basis placed, entrepreneurs preferential at pace credit resources of possibilities they use Privileged tax to pay opportunities have work production, finance, education, market in the infrastructure total advantages and from the news, to themselves beneficial has been economic to grow helper of the factors they use

Europe countries between work release high progressive reached from countries one Italy in the country this about of success main support small entrepreneurship is considered

Italy small enterprises one network or one kind of product work release around adhesion or specialization with is famous. Small of enterprises product work release volume and growth to the pace According to Italy only Greece and Spain with equalization can. of Italy international trade in the markets successful activity take going small enterprises high good quality goods export to do with attention won. Italy small businesses are usually high. quality and design with separate standing goods work releases. Emphasize transition of course, Italy small enterprises food products and another consumption of goods in export weighty place occupies. Also they are semi-finished products and integral parts, machine tools, textiles and to the skin processing give, village farm, packaging, wood again work, ceramics and to the metal processing to give equipment and " mini " technologies export to do according to too from the leaders is considered.

Italy experience high progressive reached the economy set up reach for work release big enterprises based on to build the need burden obvious manifestation is doing This is it and another many countries from experiences that's it to see maybe.

First of all developing countries important economic of the factors one, this small business development being, this about each how public interest intended efficient activities state importance have will be and supporting is strengthened. After all, it is small business activity growing, big, more efficient to business rotation, country internal the market commodity and service types with filling, that's it the way export potential development contribution the addition of the population the work with employment problem to be solved assistance of the population real income to growth reason to be can.

Secondly, of the economy globalization in the conditions of the world in the market competition straining one at the time, large enterprise or big from business according to exactly small in business to

competition friend giving, maneuvers to make. release direction change such as economic remedy events to see easy will pass

If present time in the economy main consumption goods has been need average each nine in the month changed to stand account exactly. Small business of activity advantages more clear, brighter manifestation will be economic development strong and smooth to the road down get for important importance occupation is enough

ANALYSIS AND RESULTS

Business reasonable organize reach in the model each one right activity success with completion necessary. if to the goal not enough the rest in case his management system is wrong. Organize done means. Developed of states the experience leads to this how much. enterprise if it is small, so much him management efficient organize reach opportunity rise and of the economy problems solution to be done take will come

In the Republic small business improvement and in development foreign people experiences each from the side learning is good. observation and conclusion out, right to the decision to arrive and private entrepreneurs by own personal work organize reach to the process coordination it is necessary

Small of business state by support. the following structural parts own into take need:

budget through directly help money (for example, in the USA help money 300 thousand per year to the dollar near the amount organize does). Money volume small business insurance. not done damages to cover for defined to be need. Help money of innovation Dangerous projects covers and big business does not require product types work release strengthens. State bank loans in getting guarantor as comes out That's why for small to business credit get much light rock small business tax benefits have to be need (For example, in the USA taxes when summarized 44 percent of the profit organize reaches:

36 percent national, 8 percent - state tax. if firm social to the network or work release development separated funds. If it increases, the tax table share be shortened can.

For example, Great Britain and in Italy young entrepreneurs high discount with entrepreneurship activities start and continue to continue about, as well as to the market how exit possible, businessman partners how to find about tips for free take can. From this except he himself. satisfying for the price for rent building and private business start for necessary instrument equipment taking, practical at work try to see can.

in Germany small business of support implementation of the state program is increased. To him according to entrepreneurs of activity initial two in the year without interest credit is given Next in years while at very low rates yearly percentages is charged. Thus entrepreneurs free of charge start drinking investment with is provided.

Small of business formation and in development received the experience generalization and known conclusion to do and Suggestions input for known one time should. However from now on small of business development problems clearly. These problems point to do in order to 2005 in himself one how much normative documents acceptance done. In these decisions of instructions execution small business enterprises activities more efficient done to increase chance creates.

The last one ten years. during new worker 90 % of the places are up to 20 people in enterprises to this brought. Of course, successful working big enterprises an exception not, but usually small in enterprises scientific research later on stage big in enterprises continue brought to the ceremony delivered. In most cases, small. business subjects getting bigger big business to the subject rotation giving examples. can. For example, IBM, Microsoft, Intel companies organize to be done get can.

Foreign in the states small of business development again one reason as present of the day work release alone consumption the need to satisfy saying that it is turning tooth need. Common in the US work being released 75% of details are up to 50 pieces parties organize is enough Developed of states economy high the work right and so on time the need as is defined. In this case entrepreneurship of activity the content is also different starts.

CONCLUSIONS AND SUGGESTIONS

Entrepreneurship development " the first " of history entrepreneur during the revolutionary revolution. Risky, reckless in cases work will receive person if it is calculated, the second stage while to entrepreneurs the following traits monand will be:

- searcher;
- surface came new opportunities done increasing;

- new ideas he mastered it recipient;
- good quality product and services work issuer;
- new invention of technologies (first of all, informational). doer;
- see the perspective connoisseur and him determiner.

Current period done increasing fourth stage businessman management skill attention is given He worked release factors and process, its the results reasonable governing, socio-economic o' shine provide who takes, his. and of his society wealth increase of the population marriage level to rise He can contribute. leader as embodied

But that's it o' rinda american management of representative Lee Iacocca one definition attention get necessary: "Each manager, known initial capital own work. conduct if you want. to be an entrepreneur. can. But every one entrepreneur, how much He can't be a manager, no matter how much money he has can". We are also this added to the idea. without leader to be an employee. for known from all over called character, knowledge, enthusiasm and experience need we want to emphasize.

The world practice developed market economy in countries small business socio-economic problems solution in progress, new the work their places set up in making, the market changes relatively fast in adaptation and the owners class in formation separately important and high to efficiency have that confirming. Italy experience high progressive reached the economy set up reach for work release big enterprises based on to build the need burden obvious manifestation is doing in Germany small business of support state to the program according to entrepreneurs of activity initial two in the year without interest credit is given Next in years while at very low rates yearly percentages is charged. Thus entrepreneurs free of charge start drinking investment with is provided.
